

# Tips for using MyMaths tasks

This might be of help to you when using MyMaths website.

When the children log on they will see the tasks.

The online resources are excellent, there is a lesson which is followed up with a homework task.

The online homework is visible to teachers, we can see how many attempts the child has made and what the final score is.

## Block charts

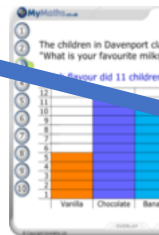

Due in 17 days

Introducing how to read and construct block charts, and using them to compare information and find totals.

Before doing the online homework task you will need to do the lesson first. If you do not score very we...

Start homework

Try the lesson

This is a message that the teacher can send to you which can explain about the task. If you hover over the message you can see it in full.

Please read!

When the task has been completed then the scores are summarised here. If it has proved too tricky then it would be advisable to complete the lesson again and then have another go at the homework set task. The number of attempts is recorded down in the right hand corner and the teacher can see this.

You can also rate the activity and say how you found it.

The teacher can then see the percentage scores and leave a comment.

## 2 times tables

Practise your 2 times tables. See how speedy you can be
